

Medium Pressure Blower

Features:

- **Compact size and lightweight**

Use new type impeller, aluminum alloy casing, absorber and side cover reduce 10% in height and 36% in weight.

- **Strong construction from dusts**

The unique impeller is difficult to be dusty. The products are responded to dusty and wet air conditions.

- **Various uses**

Clean air from oil can be obtained. The blower has various uses in suction and discharge air.

High Pressure Blower

Features:

- **High pressure and Low capacity working are available**
Adopt double bracket between casing and motor. Then the products expand the performance limitation.
- **High reliability under high temperature environment adopt the bearings enclosed area type grease**
Then the products have been improved to be stood the work in high temperature environment all the more.
