

Electric Hot Cutter

Specification:

Voltage	: 230V
Power	: 100W
Speed	: Adjustable Controller
Temperature	: Heat up to 600°C
Net Weight	: 390g

Hand-operated heat cutting tool to cut small quantities, recommended for short-time operation only. Used to cut and seal the edges of synthetic material to prevent fraying and unraveling. Such as synthetic fabric, fiber, cords, ropes, webbing, and belting.

Heat up time of a blade, approx. 6-8 seconds. Blade heat may be roughly controlled by depressing/releasing the trigger.

Function Explanation
